

YOUR GLOBAL PARTNER IN **clinical research**

TFS was founded in 1996 and has grown to become the leading global mid-size clinical CRO focusing on small and mid-size life science customers. TFS employs more than 700 professionals throughout 19 countries and currently delivers clinical research services in more than 40 countries. We provide end-to-end solutions or flexible single services. Our partnering approach with customers is based on our four business principles - trust, commitment, flexibility, and global reach. Through our Centers of Excellence we provide the best expertise, extensive site and KOL networks and specialized vendors.

It's all about trust

TFS DIVISIONS

TFS Clinical Development Services provides full-service capabilities including, development program planning, scientific advice, design and protocol writing, feasibility, project management, clinical operations, site coordination, biometrics, regulatory affairs, pharmacovigilance, medical monitoring, medical writing, quality assurance and auditing of clinical projects across all phases of the development continuum.

TFS Strategic Resourcing Solutions offers flexible and tailor-made resource solutions with a fully operational team of clinical professionals experienced in all functions and therapeutic areas. TFS employees support clients in a variety of ways, from tactical short-term assignments to strategic long-term resourcing, and full functional service provision (FSP) within all clinical development services.

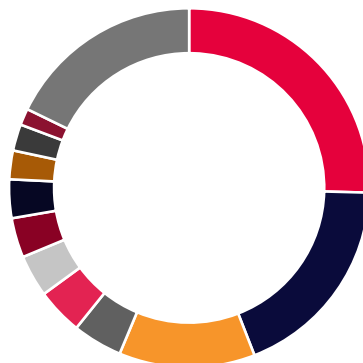

TFS CENTERS OF EXCELLENCE

Recognizing our unique customer, geographic and therapeutic focus, TFS Clinical Development Services are organized into five Centers of Excellence: Dermatology, Oncology, Ophthalmology, and all other internal medicine, supporting Phase I to Phase IV and RWE studies. Each Center of Excellence includes the best experience and expertise in their corresponding area, including regulatory, therapeutic, scientific and operational strategy teams, therapeutically aligned operational teams (Project Management, Clinical Operations, Study Startup, Biometrics and Medical Affairs), extensive site and KOL networks and specialized vendors. This enables TFS to provide our customers with a tailored approach into:

- Developing successful strategies for even the most novel therapies
- Planning and conducting effective studies
- Working with high-performing global sites
- Working with the specialized vendors

**) 2014-2018 - Based on 1044 clinical trials*

EXPERIENCE

TFS conducts regional, international and global clinical trials in over 40 countries. TFS can perform full service or individual functional services, supporting specific components of the clinical trial, in all the countries where we operate. TFS has significant experience across all phases of clinical drug development with particular strengths in Phase I/II and Late Phase RWE trials. A significant proportion of our business comes from biotechnology and small to mid-size pharmaceutical companies and, our therapeutic experience reflects their broad range of target indications. TFS focuses its in-house scientific and medical competence across the therapeutic spectrum recognizing our industry-leading capabilities within three core therapeutic areas: Dermatology, Oncology and Ophthalmology.
